ANDREW JOHNSON ON RECONSTRUCTION

ANDREW JOHNSON ON RECONSTRUCTION.

"In calling a convention to restore the state, who shall restore and re-establish it? Shati the mant who gave his indisence and his means to desiroy the Government? Is he to participate in the great work of reorganization? Shall be who brought this misery upon the State be permitted to control its destinies? If this beso, then all this precious blood of our braye soldiers and officers so freely poured out will have been wantonly spilled, all the glorious victories won by our noble simes will go for maught, and all the lattis-fields which have been sown with dead heroes during the rebellion will have been made memorial in vain. Why all this carrage and development of the work of the rest of the stations punished. Therefore I say that inntors thall take a back seat in the work of restoration."

ANDREW JOHNSON IN PAYOR OF DISFRAN-CHISING TRAITORS. "I say that the traitor has ceased to be a citizen; and in joining the rebellion has become a public enemy. He forfeited his right to vote with loyal men when he renounced his citizen; and in joining the rebellion has become a public enemy. He forfeited his right to vote with loyal men when he renounced his citizenship and sought to destroy our Government. We say to the most hopest and industrious foreigner who comes from England and Germany to dwell among us, and to add to the wealth of the country, 'Refore you can be a citizen you must stay here for five years.' If we are so cautious about foreigners, who voluntarily resounce their homes to live with us, what should we say to the traitor who, although born and rearred among us, has raised a paricidal hand against the Government which always protected him? My judgment is that he should be subjected to a severe ordeal before he is restored to citizenship."

PIANOS

Musical Justruments.

TO PURCHASERS

THE GREAT REPUTATION OF THE Each Piano has induced makers of inferior instruments to represent to their customers that the Pianos they sell are precisely the same as the Knobe, made by workmen formerly employed by them, ac., &c.

This is an old dodge, and one that is only practiced by manuncurrers, who cannot sell their instruments to the trade and consequently are compelled to force them on the market at any price.

This mode of doing business should be enough to convince purchasers at one of the SUFERIORITY. OF THE KNABE, The mere fact of small makers taking them as the STANDARD, and working upon their reputation should be all the sydence necessary. sary.

It is a well known fact that all first-class
Plano manufacturers have their established
agencies and dispose of their goods through

ng their praise.

The proper way for purchasers to supply hemselves is to apply to a responsible agent, here they know that what they buy is just a represented.

Another method of pushing bad work upon he public is to sell through Music Tuchers llowing them large commissions for recomnending their instruments. This mode of loing business of course stercases the price, as he commission must necessarily come from the purchaser.

New on hand at my warerooms. Instru-ments of other makers always on hand at lower prices than they can be purchased else-where.
